1962
OUR 69th
YEAR

SEMI-DWARF SWEET CHERRY TREES

These semi-dwarf trees will attain a height of 15 feet. We have found them to be very productive. They bear early, generally two years after you plant them. The fruit is large and sweet, and of high quality. Trees are hardy in most areas, standing temperatures to 20 below zero. They will grow in all types of soil, but do best on the higher, well drained soils. If you have 15 feet of space in your lawn or garden, you have room for one of these dwarf trees.

JAPANESE WEeping CHERRY

The drooping branches grow from a slender main trunk and will nearly reach the ground. In early May, the branches will be solidly covered with dainty rose-pink flowers. It is best suited to open lawn or gardens with a fair amount of sun. It is hardy throughout the U.S., and will thrive in all types of soil, but will do best where soil is well drained. It will attain a height of 25 feet.

5 to 6 ft. tall trees.....\$7.50 each, Not Postpaid.

VISIT OUR MODERN NURSERY

We extend a most cordial invitation to our customers who wish to come to our nursery and personally select their nursery stock.

We are located on Ohio route 84, 3 miles east of Geneva; 7 miles west of Ashtabula, Ohio. Our sales center is open daily, including Sunday, from 9:00 A.M. to 9:00 P.M., during the spring and fall planting seasons.

We have not only all the items listed in this catalog, but offer many other items in bloom, potted, etc. We shall look forward to meeting you.

Telephone HOward 6-1763

ALLEN'S *Free* GIFT OFFERS

In order to show our appreciation of both present and past patronage, it gives us great pleasure to offer these free premiums to you.

With every order of \$5.00 you may select any one of the 8 premiums we have listed.

With every order of \$10.00 you may select 2 of the premiums, alike or different.

With each additional \$5.00 you may select 1 more premium.

NOTE: The PREMIUMS you select MUST BE WRITTEN ON THE ORDER, or none will be sent, even if you notify us later. These must be sent with your order.

NOTE: Premiums are allowed only on orders for trees and plants at the catalog prices, and where orders are paid for when entered. (No premiums on C.O.D. orders.) **NO GUARANTEE ON PREMIUMS.** We reserve the right to substitute on the free gifts when the supply becomes exhausted. In case a substitute becomes necessary, we will supply an article of equal value, as near to the original as is possible.

TERMS and CONDITIONS

Inspection. All our trees and plants are carefully inspected by the state and an inspection certificate accompanies each and every shipment.

Shipment. We ship via express, mail, freight. Stock marked mail is postpaid, otherwise is packed free and purchaser pays transportation charges. We start shipping in spring any time after February 1, and continue until June 1. Please state when you wish shipment made. Fall shipment October 15.

Payment. Our terms are cash with order. Money should be sent by check, postal money order, draft, express money order or registered mail. (No C.O.D. Orders.)

Special Notice When Ordering. Please state how you wish shipment made. Write name, initial, post office, state, railroad station, R.F.D. number and R.F.D. box number very plainly so that no mistakes will happen in delivery; also use our order blank.

Delivery Methods. Purchaser pays transportation unless marked mail postpaid. All prices in this catalog are listed by mail postpaid or express collect. Because of minimum rates imposed by the Express Company certain items usually sent by express can be sent cheaper by parcel post. In order to meet postal regulations it will be necessary to prune some of these trees. This will be expertly done leaving the stock ready to plant. Where we can save the customer money in this way we will do so, sending him a bill for the postage. This is in line with Allen's policy of prompt delivery of good stock as cheap as possible.

Packing Methods. The nature of certain types of trees and plants require special packing methods and materials. We try, when possible, to ship entire orders complete in one container. Strawberry plants, Perennial plants and Seedling Evergreens require special packing and will very often be shipped separately and at a later date.

We exercise the greatest care in filling all orders. The Allen's Nurseries, Inc., warrants to the extent of the purchase price that nursery stock sold is true-to-name and as described within recognized tolerances. Seller gives no other or further warranty, expressed or implied, and will under no circumstances be liable for more than the invoice at time of purchase.

ALLEN'S GUARANTEE

Allen's guarantee everything to reach you in good growing condition. If found to be otherwise, make damage claim within 10 days after receipt of stock and we will replace damaged items free.

Allen's guarantee all stock to live. If anything fails, report such loss to us within 60 days, or not later than July 1st. After July 1st, and until October 1st, we will replace at one-half price. Replacements will be made the following planting season.

Allen's guarantee everything to be true-to-name. If found to be otherwise, we will replace free upon due proof of untruthfulness.

NUT TREES

Shade in Summer — Nuts in Autumn

CHINESE CHESTNUT

New, Blight-Resistant Strain

This wonderful blight-resistant strain makes it possible to again grow Chestnuts. The trees are hardy and vigorous, fast growing and young to bear. They will produce nuts the second year after planting. Trees will bear large crops every season. The nuts are of good size, meaty and sweet flavored. The actual size of the nuts are shown in the illustration at right. Trees will thrive on any type of well-drained soil and require very little care after the first year. Trees will attain a height of 25 feet at maturity. Plant two or more trees for best results and large crops.

By Mail Postpaid	Each	2 for
4 to 5 ft. tall trees.....	\$3.95	\$7.75
3 to 4 ft. tall trees.....	3.25	5.95

Barcelona Filberts

FILBERTS (Hazelnuts)

Early bearing, tasty, easy to crack nuts of large size and finest quality. Hardy wherever Peaches can be grown, they will grow well in all soils with a minimum of care. They will reach a mature height of 12 to 15 feet. You must have two varieties for pollination.

BARCELONA — New, large, heavy bearing.

DU CHILLY — Large, thin-shelled, best pollinator for other varieties.

ROYAL — Large, sweet, early to bear.

SHADE AND BEAUTY
PLUS PROFIT

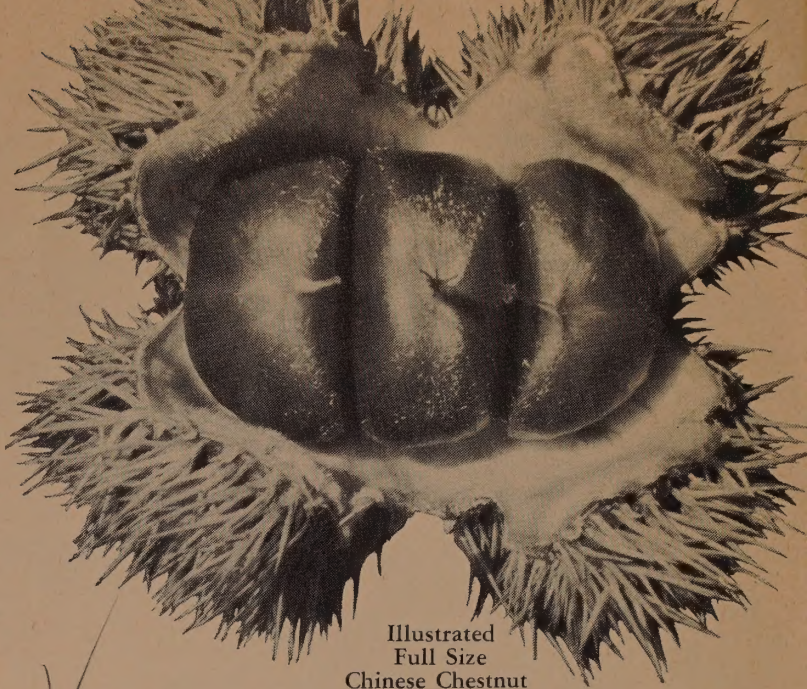

NEW HALL'S ALMOND

Hardy — Young to Bear
Delicious Nuts

This new Almond tree has a dual purpose. It is an attractive ornamental tree in spring, being smothered with large pink flowers. Fall brings you a large crop of delicious, tasty nuts. Almonds will grow and produce in any area where Peaches can be grown. The trees are rapid growing, reaching a height of 15 feet. They grow best on the lighter types of soil, such as sand, gravel and light loams. Plant two trees for cross pollination.

HARDY PECANS

Large — Thin Shelled — Meaty Nuts

The Hardy Pecan is one of the most popular of the nut trees. They are rapid growing, long lived, and easy to grow on all soil types. They will grow in almost all sections of the U. S., but will bear a crop only in the milder sections. The tree makes a fine shade or ornamental tree, reaching a mature height of 40 to 50 feet.

By Mail Postpaid	Each	2 for
2 to 3 ft. tall trees.....	\$3.65	\$6.90

Hardy Pecan

Allen's *Climatized*

**Famous Lake Erie-Grown
Peach Trees are the
Heaviest Producers**

- ★ **Extra Hardy**
- ★ **Heavy Bearing**
- ★ **Vigorous Growing**

Allen's Peach Trees are the hardiest available. They are grown in northern Ohio where the cold winters harden them, and where the rich soil builds a strong fibrous root system. These factors insure you of a strong healthy tree that will start easily and produce quickly.

BEARING AGE: The largest sizes listed, Jumbo and 4 to 5 ft., will generally bear the first year after planting. All other sizes will bear fruit two years after planting.

COMMERCIAL GROWERS: Please ask for our FRUIT GROWERS PRICE LIST offering quantity rates and a larger list of varieties that are available.

PEACH RIPENING DATES: All ripening dates in the following descriptions are based on the average dates for northern Ohio. These dates will vary from earlier to later, depending on your location.

GOLDEN JUBILEE

We recommend this Peach very highly. It is one of the hardiest Peach trees available. A sure cropper after a severe winter or cold damp spring. An early, large Peach with soft yellow skin tinted with red. Flesh is bright yellow, tender and juicy. Completely freestone. Ripens about August 14th to 18th.

ELBERTA

Elberta is universally known as the best money maker for the commercial grower. Trees bear young and produce large crops year after year. Fruit is oval shape with deep, golden-yellow skin blushed with carmine red. Flesh is golden, fine grained, firm texture and freestone. Ripens September 10th to 15th.

RICH HAVEN

The large, round fruit is golden-yellow with a bright red blush. Flesh is a clear yellow with a moderate amount of red near the pit. Texture is medium-fine, resistant to browning. Flavor is sweet and delicious. It is entirely freestone, even when dead ripe. This is an excellent commercial variety since it ships well. Ripens August 20th to 25th.

RIO-OSO-GEM

Because it is very firm fleshed, the Rio-Oso-Gem is an outstanding Peach for canning, freezing and shipping. Fruit is large in size, with a brilliant red color. Shape is slightly oval. Flavor is excellent, flesh is bright yellow and fine textured. Ripens September 20th to 25th.

BELLE OF GEORGIA

For many years, Belle of Georgia has been the leading white Peach. Fruit is large, bright red almost completely covering the white skin. Flesh is white, firm and highly flavored. Trees are vigorous and very productive. Freestone. Ripens September 6th to 10th.

HALE HAVEN

Hale Haven is among the best of the commercial varieties. The trees are vigorous and thrifty. They bear young and produce very heavy crops. Fruit is a highly colored yellow with red overtones. It colors well before it is ripe, which allows it to be picked early and have an extended market period. Fruit is large, round and firm. Flesh is golden yellow, firm and fine-textured. Flavor is sweet, a good canning, freezing and shipping variety. Ripens August 25th to 30th.

ERLY-RED-FRE

Hardy, disease-resistant, extra heavy yield, early to ripen, good keeper. These are some of the qualities that make Erly-Red-Fre an outstanding early Peach and a real money maker for the commercial grower. It has proved its adaptability to a wide range of soils and climates. Fruit is large and highly colored; attractive bright red on creamy white background. Flesh is firm-textured and white clear through to the small pit. It is completely freestone. Ripens August 1st to 5th.

FAIRHAVEN

A hardy freestone Peach that will produce a full crop in spite of cold or foggy blossom period, when many other varieties are unproductive. Fruit is round, yellow, with a bright red cheek. Flesh is yellow with a moderate amount of red at the pit. Texture is good; flavor is sweet. It is resistant to browning which is an asset in freezing or canning. Ripens August 20th to 25th.

PEACH TREES

**Cut Canning Costs in
Half by Growing
Your Own Peaches**

**All varieties good for eating,
cooking, canning, market.**

NOTICE:

PLANTING INFORMATION: Peach trees will grow successfully in all types of soil. The soil must be well drained. They should be fertilized each year with one-fourth pound of commercial nitrate fertilizer, for each year they have been planted. In other words, a tree you planted four years ago, should have one pound of fertilizer this year. The fertilizer should be broadcast under the spread of the branches in early spring. Please consult our planting guide for proper planting procedures. Trees should be planted 20 feet apart; 108 trees per acre.

POLLINATION: All peach varieties listed are self-fruitful except for J. H. Hale which may be pollinated by any other variety.

J. H. HALE

A very large, round, golden-yellow Peach of high quality. Flesh is stringless, free from grain, firm, freestone and with sweet flavor. The skin is nearly fuzzless; bright yellow blushed with red. Its appearance and very large size make a good roadside market Peach. Ripens September 10th to 15th.

RED SKIN

This new Peach is so attractive that it has commanded the highest prices on the mid-season Peach markets. The trees are vigorous, fast growing and productive. The fruit is large, round and deep red in color. The flesh is a clear yellow with little or no color near the pit. Because the flesh is very firm, Red Skin is rated highly as a top canning variety. Ripens September 10th to 15th.

RED HAVEN

The heaviest producing Peach grown. The fruit is a bright scarlet, of medium size and nearly fuzzless. The flesh is yellow, firm and sweet. The slightly smaller size of the fruit and the large yield has made Red Haven a popular home canning variety. It cannot be equalled for a home garden Peach. Ripens August 10th to 15th.

SHIPPER'S LATE RED (Big Red)

A very large, highly colored red, yellow-fleshed, freestone Peach. This is the Hale strain, the only true-to-name strain being grown. The great advantage of this variety is its late ripening date and its ability to stay on the tree much longer than most other peaches. The flavor is sweet; quality is of the highest. Ripens September 15th to 20th.

TRIOGEM

A firm, yellow-fleshed, freestone Peach of high quality. The fruit is oval in shape and large in size. It has an attractive red color over the entire peach. The fruit hangs on the tree for a long period, even when completely ripe. The fruit is nearly fuzzless. The trees are healthy and vigorous and give a heavy yield. Ripens August 18th to 23rd.

FERTILE HALE

A medium large Peach, with firm flesh and rich flavor. It is freestone. This is a good commercial variety, for it cans well and will ship long distances. Trees are extremely hardy; yield is heavy; always dependable. Ripens September 17th and 22nd.

SUN HAVEN

The fruit is large and nearly round. The color is a bright red with enough yellow ground color to provide a pleasing contrast. The flesh is firm, fine-textured, rich flavored and resistant to browning. This is our earliest variety. Ripens July 23rd to 28th.

Bartlett
Pear

ALLEN'S PEARS

PRICES ON STANDARD PEAR TREES

(Except Collette and 5-in-1)

Your Choice of Varieties, Alike or Assorted

	Each	3 for	6 for
Jumbo Size Trees, Not Prepaid.....	\$2.75	\$7.80	\$14.70
4 to 6 ft. Trees, Postpaid.....	2.35	6.60	12.30
3 to 4 ft. Trees, Postpaid.....	2.05	5.70	10.50

Pears will grow well in any ordinary soil, even in sod right in your yard. Two trees, alike or different varieties, can be planted near each other for cross-pollination. This will give you a much heavier crop than to have one tree alone. Trees should be spaced 20 by 20 feet apart; 108 trees to the acre. Pear trees will bear 4 to 5 years after planting.

BARTLETT

America's favorite for size and flavor. The fruit is large, golden-yellow, with a red blush, juicy, sweet and fine grained. Trees are vigorous and long-lived. Fruit ripens late August to early September.

BOSC

The fruit has a long, tapering neck and a long stem which helps it to remain on the tree under heavy wind conditions. The fruit is a brownish yellow color. The flesh is tender, rich flavored, very juicy and has a pleasing aroma. The trees are slow growing, but very productive. Fruit ripens in late November.

CLAPP'S FAVORITE

This pear greatly resembles Bartlett in appearance, but has a slightly higher red coloring. The fruit is large, tender, sweet and fine grained. It is very often called "Early Bartlett". Fruit ripens about August 15th.

DUCHESS

The correct name for this pear is Duchess D'Angouleme. The fruit is large, green to russet in color. Flesh is white, sweet and fine grained. Trees are vigorous and produce heavily. Fruit ripens late in October.

SECKEL

The Seckel is most often called the "Sugar Pear". The fruit is small and round, with a short tapering neck on a rather long stem. The skin is a yellow-brown with red overtones. Flesh is fine grained, juicy and very sweet. The fruit is fine for eating fresh, but is generally used for pickling. The trees are blight-resistant and produce heavy crops. The fruit ripens September 15th to 30th.

COMMERCIAL GROWERS

The commercial fruit growers who wish to purchase large quantities of fruit should write to us for a copy of our "Commercial Fruit Growers Price List". This list will offer you prices on large quantities of trees and a much larger list of varieties. We grow many more varieties of all types of fruit than we are able to list in this catalog.

EVERBEARING COLLETTE PEARS

(Plant Patent No. 1401.) The amazing new EVERBEARING Pear. It blooms at normal blossoming time, then keeps on blooming and bearing new fruit most of the summer. As a result, it bears over an extremely long period with blossoms and fruit in varying stages of growth — all at the same time. The fruit is firm, smooth textured, juicy, and has no "grit". One of the most deliciously flavored Pears on the market today. Wonderful fruit to eat fresh and for canning, too. Does not rot at the core when fully ripe. Size is medium to large.

Postpaid	Each	2 for
4 to 6 ft. trees....	\$3.50	\$6.65
3 to 4 ft. trees....	3.00	5.65

Everbearing
Collette Pear

5-in-1 Pear Tree

5-IN-1 PEAR TREE

FIVE OUTSTANDING VARIETIES ON ONE TREE!

Small home owners, with very limited space, can now have a miniature Pear orchard — by planting the 5-in-1 Pear tree. The trees are budded to the following varieties: **Kieffer, Bartlett, Orient, Seckel and Garber**. From summer through fall, you'll get a bountiful supply of delicious, nutritious fruit — for eating fresh, canning and pickling.

The trees are hardy and vigorous growing. They make beautiful ornamentals in spring when the branches are loaded with white blossoms. Easy to grow and long-lived; you will enjoy their spring loveliness and delicious fruit for years to come.

4 to 5 ft. trees, \$3.75 each; 2 for \$7.20, Mail Postpaid.

ALLEN'S CHERRY TREES

SWEET CHERRIES

PLANTING INFORMATION: Sweet Cherries should be planted as early as possible in the spring or as late as possible in the fall, for best results. They should be planted on light sand or gravel soils that are high and well-drained. Plant trees 25 by 25 feet apart; 60 trees required per acre. Trees will bear 3 to 4 years after planting.

POLLINATION: Sweet Cherries are self-unfruitful, so two varieties must be planted near each other. All varieties will pollinate each other except Napoleon, which must be pollinated by Windsor or Black Tartarian. A Sour Cherry will not pollinate a Sweet Cherry.

BING

The fruit is large, firm and solid, which makes Bing a good commercial cherry. The color is a brownish black-red. Trees are hardy and produce heavily. Ripens about July 12th.

BLACK TARTARIAN

A very large, purplish-black Cherry. Flesh is firm, yet juicy and richly flavored. The trees produce a heavy yield. Ripens June 20th to 25th.

LAMBERT

The fruit is jet black when fully ripe. Flesh is solid, rich in flavor and juicy. Trees are strong growers and heavy producers. Ripens about July 15th.

NAPOLEON (Royal Ann)

The fruit is large, pale yellow with a pinkish-red cheek. Flesh is solid, firm and sweet. Trees produce very large crops where properly pollinated. Napoleon is the top canning cherry. Ripens about July 10th.

SCHMIDT'S BIGARREAU

The giant of the black sweet cherries. This variety bears young, the second year after planting, generally. Trees are hardy and vigorous and bear large crops. Fruit is large and jet black. The flesh is dark, tender, juicy and fine flavored. Ripens about July 10th.

WINDSOR (Black Oxheart)

The fruit is large, juicy and firm. The skin of the fruit is nearly black, flesh is a pinkish-red. Windsor is a wonderful canning variety. The trees have an upright growth and produce heavily. Ripens about July 20th.

YELLOW SPANISH (Yellow Oxheart)

A large, pale yellow cherry with a red cheek. Flesh is firm, juicy and of excellent flavor. Ripens June 20th.

ALLEN'S SUPERIOR MONTMORENCY

Montmorency — The leading sour Cherry

THE PIE CHERRY

The largest sour cherry grown; superior for market, canning and pies. The fruit is dark red, firm and good flavored. The trees are semi-dwarf, requiring only 20 feet of space. They are hardy, will grow in every soil type that is well drained. The trees bear young, the second season after planting, and produce enormous crops every year for many years. Montmorency is self-fruitful, needs no pollinator. Ripens about July 10th.

* * * *

Allen's Climatized Cherry Trees are hardy, strong-rooted, northern grown insuring healthy, vigorous growth and big, dependable crops.

Allen's Dwarf Dwarf Apple Trees

You can now have a crop of delicious home grown apples right in your back yard. The dwarf trees require very little space and are very easy to grow. They produce large crops of full size apples. The trees will reach a height of 12 feet at maturity.

PLANTING INFORMATION: Dwarf Apple Trees will grow in all types of soil. Plant trees 15 feet apart. When setting trees, be certain the graft is left 2 inches above ground. The graft is the crook at the base of the trunk where it joins the root stalk. All varieties are self-fruitful.

DWARF RED McINTOSH — Large red with white flesh. Ripens in October.

DWARF RED DELICIOUS — America's favorite red apple. Ripens late October.

DWARF YELLOW TRANSPARENT — The best yellow summer Apple. Ripens in August.

DWARF WEALTHY — A popular red Apple. Ripens September.

DWARF NORTHERN SPY — A large red Apple with an aromatic flavor. Keeps well in storage. Ripens in late fall.

DWARF YELLOW DELICIOUS — Golden-yellow. Firm, sweet and juicy. Ripens in October.

DWARF CORTLAND — Deep red with white flesh. A good sweet, eating Apple. Ripens in early October.

2 SUPERIOR

DWARF CHERRY TREES

METEOR

New super-hardy variety. Will thrive in even the severest climates. Fruit is very large with attractive color and thin skin. Flavor is pleasant and mildly acid. Stone is small and very free. Flavor is excellent for eating fresh, canning and pies. Ripens early July. The trees grow 8 to 10 feet tall and bear extremely heavy crops. An outstanding variety for the home garden — a trial this spring will convince you of its merits.

NORTH STAR

An excellent new Dwarf Cherry, originated by the University of Minnesota. So hardy it will succeed farther north than any other Cherry of equal size and quality except Meteor. Fruit ripens early; is large, dark red and sprightly acid. Stone is small and easily removed. Excellent for pies and sauce. The trees grow 5 to 7 feet tall and are branched low to the ground; easy to pick and easy to maintain.

Fruit Trees

New Dwarf Peach Trees

**Quick to Bear — Require Little Space
Full Size Fruit**

Dwarf Peach Trees bear the same large fruit as the full size standard Peach trees. They are low growing, 7 to 8 feet tall, which makes them easy to care for; easy to pick the fruit, require a minimum of space. Home gardeners with limited space can now enjoy home-grown, sun-ripened Peaches.

PLANTING INFORMATION: Dwarf Peach Trees will grow in any well-drained soil. Trees should be planted 6 to 7 feet apart. When setting trees, be certain the graft is left 2 inches above ground. The graft is the crook at the base of the trunk where it joins the root stalk. All varieties are self-fruitful.

DWARF ELBERTA — America's most popular, large yellow Peach. Ripens September 10th to 15th.

DWARF HALE HAVEN — A heavy producer; large yellow with a red cheek. Ripens August 25th to 30th.

DWARF RED HAVEN — Heavy producer; bright scarlet color; yellow flesh, sweet flavor. Ripens August 10th to 15th.

DWARF GOLDEN JUBILEE — Hardy; large; yellow skin tinted red. Flesh is tender and sweet. Ripens August 14th to 18th.

Delicious Fruit**

Dwarf Pear Trees

**Big Crops — Bear Young
Full Size Pears**

Dwarf Pear Trees are hardy, productive and quick to bear. They will bear a good crop of full size fruit 2 years after planting. They will grow in any soil, and require almost no care. They will reach a height of 8 to 9 feet at maturity.

PLANTING INFORMATION. Trees should be planted 8 to 10 feet apart. When setting trees, be certain that the graft is 2 inches above ground. The graft is the crook in the trunk where it joins the root stalk. Plant 2 varieties for cross - pollination, thus obtaining larger crops.

Your choice of the following varieties:

DWARF BARTLETT — Large, yellow summer Pear.

DWARF DUCHESS — Giant size, tender, juicy, early fall Pear.

DWARF SECKEL — Small, delicious "Sugar" Pears". Ripens in late summer.

POSTPAID:	Each	2 for
4 to 5 feet tall	\$3.85	\$7.40
3 to 4 feet tall	3.50	6.70

Dwarf Apricot Trees

**Take Little Garden Space — Bear Young
Produce Large Size Fruit**

These are exactly like the large, standard Apricot trees, except they grow only half as large, about 7 to 8 feet tall. The fruit will mature to a size as large or larger than the full size trees. Dwarf Apricot trees will bear 1 to 2 years after planting and will produce heavy crops.

PLANTING INFORMATION: Follow instructions on Dwarf Peach listed above.

Your choice of the following varieties:

DWARF HUNGARIAN — Large fruit of highest quality.

DWARF SUPERB — Fruit is golden-orange; medium size; top quality.

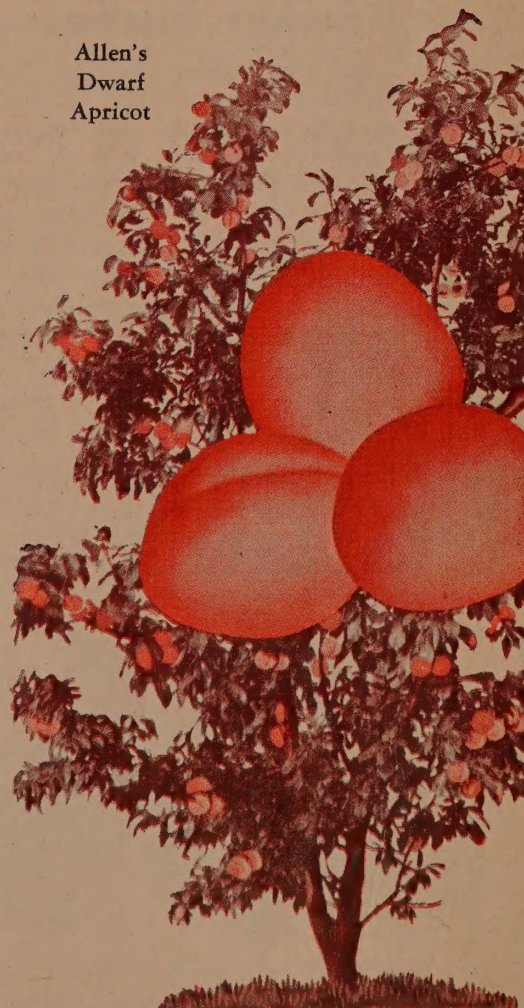

POSTPAID:	Each	2 for
Jumbo Size	\$4.15	\$8.00
3 to 4 feet tall	3.75	7.20

EARLY**

Allen's
Dwarf
Apricot

Dwarf Plum Trees

These trees grow less than half the size of the standard old-fashioned Plum trees. The fruit is full size, as large as regular Plums, and of the highest quality. The trees are self-pollenizing, but will produce heavier crops if two varieties are planted.

PLANTING INFORMATION: Plant Dwarf Plum Trees 8 to 9 feet apart. When setting the trees, be certain that the graft is left 2 inches above ground. The graft is the crook at the base of the trunk where it joins the root stalk.

Your choice of the following varieties:

STANLEY — The most popular of all Plum varieties. Large, dark blue, freestone, prune-plum. A favorite for canning, drying, preserves and eating fresh. Delicious, sweet flavor.

BURBANK — Extremely large, red-purple Plum of Japanese origin. Flesh is deep yellow with rich, sugary-sweet flavor.

YELLOW EGG — Large, egg-shaped, yellow Plum of good quality. Extremely heavy producer.

POSTPAID:	Each	2 for
4 to 5 feet tall.....	\$3.75	\$7.20
3 to 4 feet tall.....	3.40	6.50

Oka
Dwarf
Cherry

OKA DWARF CHERRY

Fruit is larger than regular Cherries, about one inch in diameter; deep purplish-red color, delicious sweet flavor. Widely used for jams and jellies, and very tasty as a fresh fruit. This hardy, Hybrid Cherry Plum will bear a full crop annually even in the coldest climates. Of prolific Dwarf habit, very hardy and early bearing. Fruit ripens late July or early August. A beautiful tree to plant in garden or border; preferably near Plum trees. Plant two or more trees for best results.

Postpaid:	Each	2 for
3 to 4 ft. trees.....	\$2.50	\$4.75

Dwarf Stanley Plum

SAPA Dwarf PLUM

Extremely hardy, heavy bearing tree that does well in all sections. Grows rapidly. Of dwarf habit but an enormous cropper, even in the coldest climates. Bears medium size fruit with small stone; red fleshed, firm, deliciously sweet and juicy. Freestone. Makes wonderful pies and sauce; good for canning and eating fresh, too. Trees bear young, often the year after planting. They make lovely ornamentals with their white blossoms in spring, followed by an abundance of brightly colored fruit. Grow them in any location — front lawn, backyard or as a border along property lines. Plant two or more trees for best results. Order early.

POSTPAID:	Each	2 for
3 to 4 ft. trees.....	\$2.50	\$4.75

EVERBEARING DWARF FIG

Can be grown indoors or outdoors. Plants bear the first year after they are set out. Fruit is of good size, sweet and delicious. Flesh is firm and meaty. Excellent for preserves, jams, canning, drying or to eat fresh. We recommend tub culture north of Philadelphia. Be the first in your neighborhood to have this entirely different fruit-order today.

Price: 2 to 3 ft. trees, \$1.80 each; 2 for \$3.40, postpaid.

ALLEN'S *Climatized* MULBERRY TREES

FINE FOR FRUIT AND SHADE

New American Mulberry

DOWNING EVERBEARING We consider this variety one of the most prolific of all Mulberries. Bears an abundance of jet-black, enormous fruits all summer. Trees are very hardy and long-lived; yield big crops of top quality berries year after year. The berries have a delicious rich flavor and are wonderful for fresh desserts, jams and jellies — for mouth-watering pies, they are without equal!

The trees grow rapidly and make a large, wide-spreading, graceful shade tree. Perfectly hardy and easy to grow; require very little care. The Mulberry is a fine ornamental and a worthwhile addition to any location. For shade, beauty and luscious, sweet fruit, we believe you will agree, the Mulberry tree is outstanding.

It is interesting to note that all species of birds prefer Mulberries to other types of berries and cherries. Many fruit growers plant them in their cherry orchards in order to keep the birds from their cherry crop.

First class, 3 to 4 ft. trees: \$1.95 each; 2 for \$3.60; postpaid.
ORDER EARLY

ALLEN'S *Standard* APPLE TREES

Delicious to Eat — Profitable to Grow

PLANTING INFORMATION: Standard Apple trees will start bearing three to five years after planting, depending on the variety and the care they receive. Trees should be set 30 feet apart; 45 trees required to the acre.

POLLINATION: All apple varieties are self-fruitful, but most varieties will bear much heavier crops when cross-pollinated by another variety planted near.

COMMERCIAL GROWERS: Please ask for our FRUIT GROWERS PRICE LIST offering quantity rates and a larger list of varieties that are available.

SUMMER APPLES

RED ASTRACHAN

A large, round fruit with brilliant crimson coloring. It is juicy and has a rich acid flavor. Fine for cooking, eating and market. Ripens in August.

YELLOW TRANSPARENT

The earliest of all summer apples. The fruit has a delicious sprightly sub-acid flavor. The flesh is white, tender, juicy. Skin is a clear yellow-green color and smooth. The trees bear young, the second year after planting. Good for eating, cooking and market. Ripens in early August.

**5-in-1
APPLE
TREE**

A Whole Orchard On One Tree

The most sensational development ever offered home gardeners. If you have room for only one tree — here it is! You can now enjoy 5 different varieties of apples, from early summer until late fall. On this one tree you get Red Delicious, Yellow Transparent, Yellow Delicious, Stayman's and Jonathan — in bountiful supply all season! Enough apples for eating fresh, pies, sauce and canning throughout the long ripening season. The trees are hardy, disease-resistant, vigorous growing and very productive. Plant one or more this spring.

POSTPAID:	Each	2 for
4 to 5 feet tall.....	\$3.75	\$7.20

Red Delicious

WINTER APPLES

CORTLAND

A large, deep red Apple that is firm and a good winter keeper. Flesh is white, firm, crisp and sweet. Good for eating, cooking, cider and market. Ripens in October.

DOUBLE RED DELICIOUS

A large, dark red apple with crisp, fine-grained flesh of excellent quality and flavor. It is a splendid winter keeper and shipper. Trees are exceptionally hardy. A regular annual bearer. An excellent eating variety. Ripens late fall.

GALLIA BEAUTY (Red Rome Beauty)

Produces huge crops of large, brilliant red fruit. Flesh is white, crisp, juicy and aromatic. Keeps well over winter in storage; will be in good condition in May or June. Ripens late fall.

JONATHAN

A favorite large red Apple of superior keeping qualities. The flesh is firm, but tender; juicy and rich flavored. An excellent cooking and eating variety. Ripens late fall.

RED McINTOSH (Rogers Strain)

The Rogers Red McIntosh is a superior strain. It bears young, is hardy and bears annually without fail. The fruit is a very attractive, deep red overall. Flesh is white, tender, juicy and crisp. A wonderful eating and cooking apple. Ripens in late fall.

STAYMAN'S WINESAP

The trees are vigorous, hardy and have a spreading growth. The fruit is deep red, slightly striped, conical and large. The flesh is firm, tender, juicy and richly sub-acid. Keeps well in storage. Ripens in late fall.

YELLOW DELICIOUS

The Yellow Delicious is similar to Red Delicious in shape and size, but the color is a rich, golden-yellow. The flesh is firm, crisp and deliciously flavored. The fruit keeps well all winter without becoming mealy. Ripens in late fall.

PLUM & PRUNE TREES

PLANTING INFORMATION: Plums and Prunes will grow well in all soil types. Trees should be planted 20 feet apart; 108 trees required per acre. They will bear 3 to 4 years after planting.

POLLINATION: For best results and large crops, Plums and Prunes should have pollinators. Damson will pollinate Fellenberg and Stanley Prunes. Burbank, Damson and Yellow Egg will pollinate each other.

COMMERCIAL GROWERS: Please ask for our FRUIT GROWERS PRICE LIST offering quantity rates and a larger list of varieties that are available.

BURBANK

The fruit is large, bright reddish purple. The flesh is yellow, meaty and quite firm. Fruit should be picked before it is completely ripe. The trees are vigorous and have a somewhat weeping habit. Ripens August 20th to 25th.

FELLENBERG (Italian Prune)

The fruit is long, oval, large and purple in color. The yellow flesh is firm, sweet and delicious. Completely freestone. The trees have a moderate growth, but produce large crops when properly pollinated. Ripens September 20th to 25th.

STANLEY PRUNE

A large, dark blue Prune; very sweet and completely freestone. The trees bear young and are adaptable to a large range of soil types. Stanley is the most popular commercial variety. Ripens September 10th to 15th.

DAMSON

The fruit is medium size, dark purple and is produced in large clusters. Very good for hand eating when completely ripe, and is extensively used for jams and preserves. Trees will produce large crops. Ripens September 19th to 24th.

YELLOW EGG

The fruit is egg shaped, large, a gorgeous golden-yellow color. The flesh is sweet, tender and juicy. It is fine for hand eating or canning. The trees are extremely productive. Ripens August 20th to 25th.

APRICOT TREES

New Improved

Delicious for Eating Fresh, Cooking, Canning, Freezing and Drying.

Apricots cannot be successfully grown in the northern locations, since they are not quite as hardy as Peaches. Fruit ripens right after Cherries and just ahead of Peaches. All varieties are self-fruitful and freestone. Plant the same as for Peaches.

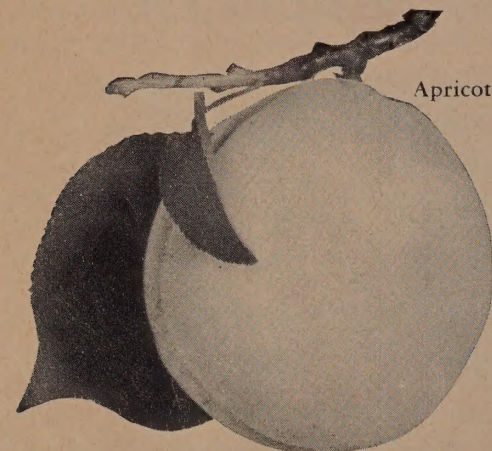

HUNGARIAN

Fruit is large, deep yellow color, flesh is yellow, juicy and sweet.

SUPERB

The hardiest of the Apricot varieties. The fruit is large, golden color and sweet.

Apricot

NECTARINE TREES

Luscious, Fuzzless Peaches . . .
Good for Canning

This very distinctive fruit is a cross between the Peach and the Plum and incorporate the best qualities of both. The skin is smooth and is colorful. Nectarine is often called the "Fuzzless Peach." It is freestone, very sweet and delicious. The trees will grow and produce where Peaches can be grown. Plant the same as Peaches. Trees will bear 2 years after planting.

GOLDMINE

A very appealing golden color; flesh is firm, sweet and juicy. The fruit is of medium size, but excellent quality. Trees bear young and produce large crops. Ripens in September.

RED ROMAN

The fruit is a greenish-yellow color, with a deep red cheek. The flesh is golden, juicy and tangy. The trees are vigorous growers and heavy bearers. Ripens in late August.

GIANT HYBRID BLUEBERRIES

To Make Those Luscious Pies, Jams, and Jellies

EVERYONE WILL RAVE ABOUT

The Giant Hybrid Blueberries are far superior to the ordinary wild Blueberries. They are the result of many years of successful plant breeding. Two to six plants will furnish the average family with more than enough berries. Early varieties will begin bearing in late June and the season extends for about 5 to 6 weeks.

PLANTING INFORMATION: Blueberry plants will grow in any fertile soil. They must have acid in the soil and plenty of moisture. Add liberal mulchings of acid peat, rotted leaves or sawdust each year. Fertilize periodically with Aluminum Sulfate. Cultivate shallowly, so as not to expose the shallow roots to the air. Plant 4 to 5 feet apart. Plants will generally bear some fruit the first season.

POLLINATION: Hybrid Blueberries are not self-fruitful. You must plant two different varieties, to obtain fruit. Any two varieties, regardless of whether they are early, midseason or late ripening, will pollinate each other.

ATLANTIC (Late-Midseason)

The fruit is very large, deep blue color, highest quality. Bushes will produce very heavy crops.

DIXIE (Late)

A large and vigorous growing plant. Berries are large, firm and bright blue.

JERSEY (Late)

The berries are extremely large; a light blue color, firm and sweet. The bushes are vigorous and grow to a large size.

PEMBERTON (Late)

Very vigorous plants. A heavy producer of firm, light blue berries, of large size.

RUBEL (Midseason)

Vigorous and strong growing; plants often reach six feet or more. Fruit is light blue; medium to large in size. A very heavy producing variety.

WEYMOUTH (Earliest)

A medium upright bush, yielding extra large, dark blue berries. A very heavy cropper of fast ripening fruit.

Also A Decorative Ornamental Shrub. Use them as a border or foundation if you lack other space. Flavorsome fruit and beauty starting this spring.

Newest HYBRID BLUEBERRY Introductions

BERKLEY (Late)

One of the newest, choice varieties, producing the largest berries of any variety yet introduced. The fruit is light blue, with strong skin and firm flesh. Excellent for home use or shipping. The plants are very productive.

EARLIBLUE (Extra Early)

This new variety ripens extra early and has an unusually delicious flavor. The fruit clusters are medium size; fruit is very firm; subacid; light blue in color. The bush is very vigorous, upright in growth and a heavy producer.

BLUECROP (Midseason)

The fruit clusters are large; berries are roundish-oblate; light blue in color; firm; subacid; well flavored. A vigorous, upright grower; produces abundant crops annually.

COVILLE (Late)

Coville is one of the latest varieties to ripen; it extends the Blueberry season by at least two weeks. Berries are firm, crisp, juicy; of excellent quality and flavor. Berries ripen to a beautiful deep blue color and lasts well on the bush.

Indian Summer

INDIAN SUMMER EVERBEARING RED RASPBERRY

Hardy — Heavy Fruiting — Two Crop Variety

Indian Summer is a hardy, vigorous, upright growing variety. The fruit is born in large clusters; every berry maturing to full size and color. They bear large summer crops commencing in June, followed by a fall crop starting in September and continuing until frost. The fruit is of the highest quality, bright red, large, juicy and sub-acid.

1 Yr. No. 1 Plants, 10 for \$2.85; 25 for \$5.55; 50 for \$8.95; 100 for \$15.45; 250 for \$32.95, POSTPAID. 500 for \$51.75; 1000 for \$90.00, NOT POSTPAID.

Allen's RED RASPBERRIES

DEPENDABLE — HEAVY BEARING — DISEASE FREE

RED RASPBERRIES are delicious to eat fresh, for pies, short-cakes, sauce, jam, juice and freezing. They are one of the easiest fruits to grow; very hardy and productive. 25 plants will supply the average family.

PLANTING INFORMATION: Plant in good garden soil 3 to 5 feet apart in rows 6 to 7 feet apart. Set plants 1 to 2 inches deeper than they were in the nursery. Firm soil over roots and water well. Cut back tops to about 6 to 8 inches in height. Allow new shoots to make a row 6 to 8 inches wide. Plants will bear a crop the second year after planting.

LATHAM

America's Most Popular Raspberry

Latham produces a heavy crop of large, bright red, delicious berries. The plants are strong and vigorous growers; adaptable to a wide range of soils and climates. Latham is very hardy; they thrive and produce well even in Canada.

1 Yr. No. 1 Plants, 10 for \$2.85; 25 for \$5.55; 50 for \$8.95; 100 for \$15.45; 250 for \$32.95, POSTPAID. 500 for \$51.75; 1000 for \$90.00, NOT POSTPAID.

CERTIFIED DISEASE FREE

All Raspberry plants have been inspected against disease, not once, but three times by state inspectors. Plants have been carefully graded to guarantee you only the largest and best rooted. They will be packed in the best packing materials to insure their freshness on arrival.

**PROFITABLE
EASY-TO-GROW**

VEGETABLE PLANTS

Rhubarb

RHUBARB

Rhubarb is the earliest spring vegetable. It is often listed as a fruit because once planted, it will last a lifetime, coming up year after year without special care or attention. Plant 3 to 4 feet apart, covering the crowns with 2 inches of soil.

CHIPMAN'S CANADA RED

This red Rhubarb has large stalks that are red from top to bottom, even the flesh is red. It does not lose this rich color in cooking. It is juicy and sweet, requiring very little sugar. The skin is so tender you need not peel it. Very productive, you can pull stalks all spring and summer.

\$1.10 each; 3 for \$2.85; 6 for \$4.95, Postpaid.

MYATT'S VICTORIA

The old-fashioned Rhubarb. Still very popular. The stalks are very large; tender without being stringy. The flavor is mild and sub-acid.

Whole Roots—3 for \$1.50; 6 for \$2.85; 12 for \$4.95, Postpaid.

ASPARAGUS

For home use plant Asparagus 18 to 24 inches apart each way, 3 to 4 inches deep, spreading roots out flat. A good bed of Asparagus will last for many years. Our 2 year roots will produce a crop of thick, tender tips the second year after planting. It can be cut over a period of 6 to 8 weeks each spring. Plant 25 plants for the average family eating.

MARY WASHINGTON

This is the leading and best variety available. The tips are solid and compact; often more than an inch thick, yet remaining tender and crisp. It has a good green color which it retains even after cooking or freezing. The flavor is rich, mild and tasty. Mary Washington is very productive and rust-proof.

Allen's

BLACK RASPBERRIES

PLANTING AND CULTURAL INFORMATION: Black Raspberries will grow in any fertile soil, but will do best on light soils where humus and moisture are abundant. Plant 4 to 5 feet apart in rows 6 to 7 feet apart. Plants should be set so that roots are 1 or 2 inches deeper than they were in the nursery. After the plants are set the stems should be cut back close to the ground. This tends to develop sturdy new shoots and a strong root system, whereas if the original stems are left on the plant may die, even though they seem at first to thrive and may even bear some fruit the first year. For further cultural information on the care of Raspberries, we refer you to our "FREE PLANTING GUIDE" sent to you with each order. Black Raspberries will bear the second year after planting.

NEW MORRISON

The Giant Black Raspberry

An extremely large berry, nearly an inch in diameter, glossy black, firm, sweet and nearly seedless. The berries do not crumble, which makes it a good commercial variety. Ripens late, a few days after Cumberland. The plants are hardy, disease-resistant and heavy bearing.

No. 1 Plants, 10 for \$2.70; 25 for \$4.95; 50 for \$8.55; 100 for \$14.85, POSTPAID.

250 for \$27.50; 500 for \$47.50; 1000 for \$85.00, NOT POSTPAID.

ORDER EARLY!

Sodus
Purplecap

NEW

Black Hawk

BLACK RASPBERRY

**Large Berries — Delicious Flavor
OUTYIELDS ALL OTHERS**

Black Hawk is proving to be a real leader. The exceptionally high yield (5000 pints per acre) plus the unusually large berries ($\frac{3}{4}$ inch in diameter) make it attractive to both the home gardener and the commercial grower. The berries hold up well in shipping and handling; they are firm and do not crumble. Beautiful glossy black, firm, juicy, sweet and richly flavored. The plants are hardy and strong growers. Ripens midseason.

No. 1 Plants, 3 for \$1.25; 5 for \$1.85; 10 for \$3.25; 25 for \$6.25; 50 for \$11.75; 100 for \$19.95, Postpaid.

CUMBERLAND

The Old Favorite Blackcap

An old favorite and still the most widely planted variety. The berries are large, firm, round, glistening black with a rich, delicious flavor. Plants are self-supporting, hardy, thrifty growing and will thrive anywhere. Begins ripening in mid-summer and bears through the late season.

No. 1 Plants, 10 for \$2.70; 25 for \$4.95; 50 for \$8.55; 100 for \$14.85, POSTPAID. 250 for \$27.50; 500 for \$47.50; 1000 for \$85.00, NOT POSTPAID.

SODUS PURPLE RASPBERRIES

**Bright Purple Color — Delicious Flavor
HEAVY BEARING**

Sodus plants are vigorous and hardy; bearing enormous crops annually. The berries are round, bright purple, firm and non-crumbling. The fruit begins to ripen shortly after Latham and continues to ripen over a period of several weeks. Planting and cultivation are the same as for Black Raspberries.

No. 1 Plants, 5 for \$1.75; 10 for \$2.85; 25 for \$5.55; 50 for \$8.95; 100 for \$15.45, POSTPAID. 250 for \$31.75; 500 for \$51.75; 1000 for \$90.00, NOT POSTPAID.

Brilliant
Strawberry

✓ CHIEF BEMIDJI NEW! — EXTRA HARDY!

A new super-hardy, everbearing Strawberry developed at Bemidji, Minnesota where temperatures are often lowest in the United States (40 to 50 degrees below zero). Chief Bemidji survives these temperatures with no winter cover and rewards you with large, beautiful berries, bright scarlet-red to the core. A big cropper, high sugar, extremely sweet, low acid flavor. A winter-proof variety that will not only provide you fresh, sweet berries in June, but also in mid-summer and again abundantly from September until frost.

PRICES: 12 plants \$1.95; 25 for \$3.75; 50 for \$6.50; 100 for \$10.95, POSTPAID.

EVERBEARING STRAWBERRIES ✓ BRILLIANT

The plants are extremely hardy and productive. In actual tests with other everbearing strawberries, Brilliant outproduced all others by more than 2000 quarts per acre. The plants are so vigorous, you can pick ripe berries just a few weeks after planting. The berries are large, brilliant red clear through; flavor is rich and tangy-sweet.

PRICES: 12 plants \$1.75; 25 for \$3.25; 50 for \$5.75; 100 for \$9.95; 250 for \$23.50; 500 for \$42.85, POSTPAID.

✓ RED RICH

(Plant Pat. No. 993) Red Rich bears the reddest, sweetest berries you ever saw. Yields a heavy crop in June and keeps right on producing all summer, and into fall. The berries are big and red clear through. Perfect for freezing as they will not mush-up when thawed. Plants are vigorous, thrifty growers and make a good fruiting row.

PRICES: 12 plants \$2.95; 25 for \$5.00; 50 for \$8.50; 100 for \$15.00, POSTPAID.

✓ SUPERFECTION

An outstanding everbearing strawberry that merits your attention. Plant in April and you'll be eating berries 60 days later. Superfection will give you 3 big crops a season. The berries are large, firm, sweet and red clear through. It has proven to be very hardy and withstands adverse weather conditions. Plants are vigorous growers and quickly develop long runners.

PRICES: 25 plants \$2.35; 50 for \$4.25; 100 for \$6.95; 250 for \$12.95, POSTPAID. 500 for \$19.95; 100 for \$32.00, NOT POSTPAID.

SPECIAL PRICES ON LARGE QUANTITIES

Commercial growers wishing to purchase large quantities of plants, please send us a list of your needs. Special prices will be quoted by return mail.

New JUNE-BEARING STRAWBERRIES

SURECROP (Midseason)

We consider Surecrop one of the best midseason berries. The fruit is big, bright red color, with glossy skin, firm flesh; holds well for shipping and is ideal for freezing. Surecrop is red-stele resistant, a vigorous plant maker and a dependable producer of heavy crops. The flavor is tangy, sweet and delicious. Our plants are grown from U.S.D.A., virus-free stock.

PRICES: 25 plants \$1.55; 50 for \$2.55; 100 for \$4.05; 250 for \$8.15, POSTPAID. 500 for \$11.50; 1000 for \$18.50, NOT POSTPAID.

EARLIDAWN (Extra Early)

Nearly frost-proof, extra early ripening, heavy yields, are some of the qualities that make Earlidawn the leader with commercial growers and home gardeners alike. The berries are large, glossy bright red color, firm texture and delicious flavor. Perfect for freezing. Earlidawn has been above the average in yield tests. Our plants are from virus-free stock.

PRICES: 25 plants \$1.65; 50 for \$2.65; 100 for \$4.30; 250 for \$8.55, POSTPAID. 500 for \$12.25; 1000 for \$19.50, NOT POSTPAID.

CLIMBING HYDRANGEA

(*Hydrangea petiolaris*) A woody vine that clings to brick or wooden walls without support. It does fine on old trees and stumps. Its foliage is bold, clean and shrub like, with a rich green color. Short spur branches project from the wall and are topped with white, fragrant, Hydrangea-like blooms throughout the summer. Vines will grow to twenty feet; does equally as well in shade or sun. **POSTPAID**

Strong, 2 year Vines; \$3.25 each; 2 for \$6.25

EVERBEARING TREE BLACKBERRY

The sensational tree type Everbearing Blackberry produces a full crop of large, jet black berries early in the summer, with quite a number of berries during the summer and another crop in the fall. The plant is a vigorous grower, canes are husky, standing erect, resembling small trees. Plants are hardy and easy to grow. Plant 8 feet apart. Prune back tips of the young growth each spring for best results.

2 yr. No. 1 Plants, 65c each; 3 for \$1.75; 6 for \$3.35. POSTPAID.

FLAME AZALEA

(Azalea mollis) The Flame Azalea is one of the showiest shrubs, with brilliant orange-scarlet flowers and bright green foliage. The individual flowers and flower clusters are unusually large and are borne in great profusion in early spring.

The plant is very hardy and easy to grow. It will succeed in full sun and partial shade. The plant grows to four feet tall and nearly as broad. Perfect for formal plantings, in groups and in the foreground of shrub borders and foundation plantings.

12 to 18 inch plants, \$2.95 each, POSTPAID.

NEW — "CHEROKEE CHIEF" RED DOGWOOD

The new and distinctive red-flowering Dogwood. The color is a rich, ruby-red that holds up throughout the blooming period. Makes a striking color accent for the lawn or perennial border. The spring foliage is dark green, changing to gorgeous red shades in the fall. Grows 8 to 10 feet tall. It does well in any fertile soil; prefers a shaded location. The small size makes it especially suited to the low ranch homes,

Hansen's BUSH CHERRY

A sensational hybrid bush Cherry, valuable not only for its excellent fruit but for its ornamental quality as well. Grows 3 to 4 feet tall; bears great quantities of large, glistening black cherries which make delicious jam, jelly and sauce. Extremely hardy and well adapted to colder climates where standard Cherries fail. The bush is very decorative; white flowers in spring, followed by silvery green foliage which turns maroon red in fall.

ALLEN'S GUARANTEE

Allen's guarantees everything to reach you in good growing condition. If found to be otherwise, make damage claim within 10 days after receipt of stock and we will replace damaged items free.

Allen's guarantees all stock to live. If anything fails, report such loss to us within 60 days, or not later than July 1st, for free replacement. After July 1st, and until October 1st we will replace at one-half price. Replacements will be made for the following planting season,

Allen's guarantees everything to be true-to-name. If found to be otherwise, we will replace free upon due proof of untruthfulness.

Allen's HARDY JUNE-BEARING STRAWBERRIES

**All Strawberry Plants are
Grown From VIRUS FREE Stock**

Strawberry plants will thrive in any good garden soil. June bearing varieties will bear the second spring after planting. Everbearing varieties will begin to bear about sixty days after planting.

PLANTING INFORMATION: Set plants 12 to 18 inches apart in rows. Plant by pushing spade into ground to full depth, press to one side, insert roots and spread them out fan shape and hanging down to their full length. Set plant crown even with soil surface. Plants are shipped to you in a dormant state. There are almost no green leaves on the plants. This is the best type of plant to plant. The crowns will produce new green leaves very soon after weather warms, and will grow very rapidly from that time on. For complete planting instructions, we refer you to our planting guide booklet that is sent to you with each order.

FERTILIZATION: Fertilize Strawberries each year by broadcasting commercial 5-10-15 fertilizer at the rate of 1 pound for 50 sq. feet. When applying fertilizers be careful not to get a concentration on the leaves of the plants, for this will cause a burning of the plant.

ARMORE (Midseason)

Armore produces over a long period and makes a good fruiting row. The berries are of excellent quality, large, bright red color. They are firm and hold up well in handling and shipping. Tests have shown yields of 12,000 to 13,000 quarts per acre.

PRICES: 25 plants \$1.45; 50 for \$2.45; 100 for \$3.95; 250 for \$7.90, POSTPAID. 500 for \$11.25; 750 for \$14.85; 1000 for \$18.00, NOT POSTPAID.

CATSKILL (Midseason)

The berries are large, uniform, bright red and of good flavor. The plants are vigorous and productive; hardy and frost-resistant.

PRICES: 25 plants \$1.55; 50 for \$2.55; 100 for \$4.05; 250 for \$8.15, POSTPAID. 500 for \$11.50; 750 for \$15.25; 1000 for \$18.50, NOT POSTPAID.

FAIRFAX (Early)

The berries are very large; deep red and honey-sweet. It is well adapted to the northern states as it is quite winter hardy. Plants are vigorous and productive. An outstanding roadside market variety.

PRICES: 25 plants \$1.55; 50 for \$2.55; 100 for \$4.05; 250 for \$8.15, POSTPAID. 500 for \$11.50; 750 for \$15.25; 1000 for \$18.50, NOT POSTPAID.

POCAHONTAS (Midseason)

The berries are extra firm and tough-skinned; the color is a vivid, glossy red. The flavor is tart and tasty. The plants are unusually vigorous.

PRICES: 25 plants \$1.55; 50 for \$2.55; 100 for \$4.05; 250 for \$8.15, POSTPAID. 500 for \$11.50; 750 for \$15.25; 1000 for \$18.50, NOT POSTPAID.

PREMIER (Early)

For many years Premier has been the leading early money-maker. It yields heavily and is a thrifty grower. The berries are large, firm, deepest red and of high quality. The plants are very hardy. You are always sure of a crop with Premier.

PRICES: 25 plants \$1.45; 50 for \$2.45; 100 for \$3.95; 250 for \$7.90, POSTPAID. 500 for \$11.25; 750 for \$14.85; 1000 for \$18.00, NOT POSTPAID.

JUMBO (Midseason)

This exceedingly vigorous grower produces huge crops of extra large berries, with a flavor mild and sweet. Berries are firm and solid, dark red when fully ripe. Plants are thrifty and rapid growing, making an excellent fruiting row. Ripens a little later than Premier. Especially good for preserving and home freezer. Keeps and ships well, too. One of the heaviest yielding varieties grown.

PRICES: 25 plants \$2.50; 50 for \$4.15; 100 for \$6.65; 250 for \$13.25, POSTPAID. 500 for \$18.75; 750 for \$24.75; 1000 for \$29.95, NOT POSTPAID.

Armore (Midseason)

ROBINSON (Midseason)

Robinson is often called "Scarlet Beauty". The fruit is large, conical, and deep scarlet red clear through. Very firm and glossy. Delicious for fresh fruit and preserves.

PRICES: 25 plants \$1.45; 50 for \$2.45; 100 for \$3.95; 250 for \$7.90, POSTPAID. 500 for \$11.25; 750 for \$14.85; 1000 for \$18.00, NOT POSTPAID.

SPARKLE (Late)

A high quality berry with rich red color clear through. Sparkle is a top freezing and processing variety. The plants are vigorous and produce a heavy yield; will produce under the most adverse weather conditions. It is highly resistant to red stele disease.

PRICES: 25 plants \$1.55; 50 for \$2.55; 100 for \$4.05; 250 for \$8.15, POSTPAID. 500 for \$11.50; 750 for \$15.25; 1000 for \$18.50, NOT POSTPAID.

VERMILION (Early)

Vermilion is red stele resistant. The fruit is solid and has a fine red color which makes it outstanding as a freezer. It will produce large crops; berry is of medium size and solid. Plants are resistant to Verticillium-wilt and leaf spot. A good commercial variety, where disease has been a problem.

PRICES: 25 plants \$1.45; 50 for \$2.45; 100 for \$3.95; 250 for \$7.90, POSTPAID. 500 for \$11.25; 750 for \$14.85; 1000 for \$18.00, NOT POSTPAID.

**For Bigger Crops — Better Berries
Plant Allen's Superior Strawberry Plants**

BERRY-SET

Bigger Berries — Bigger Yields

A Hormone Spray for STRAWBERRIES. Makes berries grow 50% to 100% larger, meatier, sweeter and more luscious. Increases yields greatly. Sprayed berry plants bear ripe fruit over a longer period. Easy to use — just mix with water as directed on the package.

1 oz. (makes 4 gal.).....\$.65 ppd.
3 oz. (makes 12 gal.)..... 1.25 ppd.

ALLEN'S GRAPE VINES

Hardy — Young Bearing — Delicious

The Fruit of Kings. Down through the ages, Grapes have provided the world with dessert, jelly, jam, juice and warm friendly wines. Grapes are easy to grow. They do well on all types of soils, require very little care. They begin bearing 2 years after planting and will continue to bear for nearly a lifetime.

PLANTING INFORMATION: Plant vines 6 feet apart to be trained on arbors or along fences. If planted in rows, the rows should be 8 feet apart; 907 vines to the acre. Dig hole broad and deep. Cut back tops to 2 or 3 good strong buds. Plant deep to prevent roots from drying out. See our planting guide for more complete instructions.

Interlaken
Seedless
Grape

INTERLAKEN SEEDLESS

A new variety producing rich, golden-yellow fruit of medium size. The berries are sweet; flesh is meaty, solid and crisp. Can be eaten whole like a California grape. Ripens in August.

POSTPAID	Each	2 for
Large, 2 Year No. 1 Vines.....	\$1.65	\$2.95

CONCORD — Early, Blue-Black

The most popular, most widely planted of all Grapes. The bunches and berries are very large; color is an overall blue-black. The leading wine and market grape. Good for eating, juice and jelly. Ripens September 25th to 30th.

— NOTICE — COMMERCIAL GROWERS

Commercial Growers desiring to purchase larger quantities of Grape Vines, please send us a list of your planting needs. A special quotation of prices will be sent to you by return mail.

Red Lake
Currant

Red Lake CURRANTS

**Finest of all Currants—Large Berries—Excellent Quality
Long Well-Filled Clusters of Cherry Red Fruits**

The leading Red Currant for both home gardens and commercial growers. The berries are exceptionally large and of excellent quality; borne in long clusters that are well-filled out to the top, and with stems sufficiently long to make picking easy. The berries are high in pectin, and have a beautiful, light red color and delicious, rich flavor—everyone enjoys them in jelly and jam—and simply wonderful pies!

Our Red Lake Currant bushes are vigorous, upright growers and highly productive. Just a few bushes in the garden will supply the average family with enough fruit for every home use. The berries ripen early midseason and hold on over a long period, so they may be harvested and marketed as desired, making them an ideal crop for the commercial grower. We recommend Red Lake as the world's best Red Currant.

HARDY HEDGES THE FRIENDLY WAY TO FENCE

HARDY AMUR RIVER NORTH PRIVET

Extremely hardy, it will withstand the severest winters. The best Privet for northern plantings. It will grow to a height of 10 feet but may be pruned to any desired height and sheared to any desired shape. Foliage is a medium green; growth is upright and dense. Plant 12 inches apart.

CALIFORNIA PRIVET

Beautiful, waxy, deep green leaves that stay on until Christmas. Growth is rapid, upright and dense. Will grow to 10 feet, but can be pruned to any desired height. Not as hardy as Amur or Ibolium. Plant 12 inches apart.

HARDY IBOLIUM PRIVET

Ibolium is often called "The Hardy California Privet". It is very similar to California in appearance, but slightly more spreading in growth. Completely hardy for northern planting. Plant 12 inches apart.

PRICES: Amur River North, California and Hardy Ibolium Privets

Hardy Privet Hedge

Barberry Hedge

INFORMATION ON HEDGE PLANTS

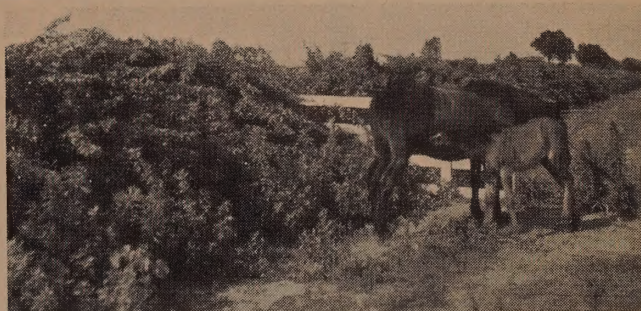

Many nurseries will offer hedge plants at very low prices. These are bed grown seedlings. They are all right, but it will require 3 to 4 years of growing before you will have a hedge that is attractive and showy. ALLEN'S offer only large, well-branched, field grown plants. Plant ALLEN'S hedge plants 12 inches apart and you'll have a thick, full hedge almost at once.

MULTIFLORA ROSES

A LIVING FENCE — IDEAL FOR FARMS

Very hardy hedge plant that grows rapidly and thrives everywhere. Requires no training or pruning. No expensive upkeep or repair bills. Grows 8 feet tall. Very compact and dense, so animals can't get through. Blooms freely every year. Makes a beautiful and practical fence, that will add beauty and value to your property. Set plants 12 inches apart.

Easy-to-Grow BLACKBERRIES

EBONY KING. The sensational new, super-bearing Blackberry. Every plant will yield an excellent crop of fine quality, full-sized fruit. Berries are glossy black, large and jam-packed with tangy, sweet flavor. Excellent for pies and canning. Plants are hardy, vigorous growing.

No. 1 Plants, 3 for \$1.65; 6 for \$2.65; 12 for \$4.45; 25 for \$7.85, postpaid. 50 for \$13.50; 100 for \$23.75; 500 for \$92.50, not postpaid.

ELDORADO. One of the largest Blackberries in existence. Perfectly hardy in all sections — will stand 20 degrees below zero. Berries are jet black, very sweet and juicy, and practically coreless. Very popular for canning; holds its firm texture and dark color. An exceptionally heavy producer. In our opinion, the best commercial Blackberry.

No. 1 Plants, 5 for \$1.00; 10 for \$1.85; 25 for \$3.25, postpaid. 100 for \$10.95; 250 for \$25.00; 500 for \$45.00; 1000 for \$80.00, not postpaid.

GOOSEBERRIES

DOWNING. Large, attractive, pale yellow fruits; thin-skinned, tender, juicy and sweet. Excellent for cooking and table use. Hardy in northern sections. Grows rapidly; bears heavily.

PIXWELL. A tremendous bearer of large, fine quality berries. The berries hang on slender stems 2 inches below regular branches, making them easy to pick. Large, oval, light green berries; turn pink when ripe. Favored for sauce and tasty pies. Hardy. Not as thorny as other varieties.

Postpaid	Each	3	10
2 Yr. Plants.....	\$1.25	\$3.45	\$9.95

Allen's **FLOWERING SHRUBS**

New

"Lynwood Gold" FORSYTHIA

A superior new Forsythia, originated in Ireland. It flowers more profusely than older varieties and the individual blooms are larger, fuller and hold up better under adverse weather conditions. The color is a brilliant golden yellow. Grows 5 to 7 feet tall. Branches are loaded with blooms in early spring.

POSTPAID	Each	2 for
2 to 3 ft.....	\$1.50	\$2.75
18 to 24 in.....	1.20	2.15

WHITE BRIDAL WREATH

(*SPIRAEA vanhouttei*) This is the most popular flowering shrub. Tiny white blossoms are borne in clusters, completely cover the bush in May and June, appearing as a graceful white fountain. Thrives everywhere, in sun or partial shade. Hardy. Grows about 6 feet tall.

POSTPAID	Each	2 for
2 to 3 ft.....	\$1.10	\$1.95
18 to 24 in.....	.85	1.45

BLUE HYDRANGEA

HYDRANGEA, *Nikko Blue*. New, hardy strain which produces immense flower heads 6 to 12 inches across; last for many weeks. An acid soil is necessary to maintain the blue color; a small amount of aluminum sulphate applied to the soil once or twice during growing season will result in a deeper blue color. Grows 3 to 4 feet tall. Lovely for specimen planting or border.

POSTPAID	Each	2 for
No. 1 Field-grown plants.....	\$1.75	\$3.25

SUMMER LILAC

(*Butterfly Bush or Buddleia*)

No other shrub can compare with the Summer Lilac for freedom of bloom. They bloom profusely and continuously from early summer to frost. They make an attractive compact bush about 4 feet tall. The roots are hardy; the tops die in winter, then come up again even more vigorously the next spring. The fragrant flowers are beautiful in the garden and fine for cutting. Plant in full sun or part shade. **We offer the following varieties:**

BURTONI — blue flower with orange eye.

PINK CHARMING — long spike; soft pink.

RED GLORY — long spike; rich red.

Strong, No. 1 Field-Grown Plants
\$1.10 Each 2 for \$1.95 **POSTPAID**

AMERICAN CHRISTMAS HOLLY

(*Ilex Opaca*) Now you can grow beautiful Christmas Holly right in your own yard! Holly experts have produced a variety which is acclimated to northern states. It is extremely hardy and comparatively free from disease and insects. Its distinctive, glossy green foliage and abundance of bright red berries make a valuable addition to any landscape. It offers readily obtainable branches for your Christmas season decor. We offer either MALE or FEMALE plants. Please specify which is desired. For best results plant one of each.

POSTPAID	Each	2 for

GOLD TWIG DOGWOOD—Grows 5-6 ft. tall. Deep green foliage; golden bark.

OLD-FASHIONED MOCK ORANGE—Grows 8-10 ft. tall. White blooms; fragrant.

Tree Hydrangea

GOLDEN CHAIN TREE

(**LABURNUM Vossi**) One of the most beautiful low-growing ornamental trees. Flowers of purest golden-yellow are borne in graceful, chain-like clusters 12 to 18 inches long. Blooms profusely in late spring, transforming the tree into a gorgeous mass of golden yellow. Smooth bright green bark and large, clover-shaped foliage make it handsome in all seasons. Does best in a location on north side of the house or where it has some shade. Grows 20 feet tall. A rare show-piece for every garden.

FLOWERING TREES

A Vision of Loveliness Year Around

TREE HYDRANGEA

(**HYDRANGEA PEE GEE**) A beautiful small tree, bearing immense, pyramidal flower trusses. Blooming in early August, the snow-white blossoms gradually change to luminous pink in fall. The tree seldom grows more than 8 to 10 feet tall. Very hardy and long-lived. Disease-resistant. Does well in all sections. Requires little care. Here is a fine, choice tree for planting among shrubs and as single specimens to decorate your lawn. For

charming winter bouquets, cut and dry the flowers in fall.

Paul's Scarlet Hawthorne

PAUL'S SCARLET HAWTHORNE

Great masses of double, scarlet-crimson flowers on irregular branches, and yellow-green bark make this a very showy tree and a perfect color accent among other plantings. Grows 15 to 20 feet tall. Very hardy and easy to grow. Has attractive, broad, multi-toothed leaves and brilliant scarlet fruits. Especially well suited to the small garden and for lawn specimens. We consider it one of the choicest ornamental trees, and deserving of a place in every landscape plan.

Thundercloud Plum

THUNDERCLOUD PLUM

(**Purple-Leaved Plum**)

Something new and different in ornamentals! Makes a beautiful specimen tree for the lawn; also valuable for color contrast among shrubs and other trees. Thousands of lovely pink flowers cover the branches in spring, followed by "purple" foliage. The foliage retains its rich, purple color throughout the season. The tree is compact, low-growing; about 10 feet tall at maturity. We consider this variety an improvement over the more common types, particularly as to color and growth habit. Ideal for the small yard, and as a focal point in the garden.

Kwanzan Flw. Cherry

KWANZAN FLW. CHERRY

Most famous and best variety of Pink Flowering Cherry. Admired by countless visitors to Washington, D. C., every spring. Makes a striking appearance as a lawn specimen because of its unique form. Dainty, very double, rosy-pink flowers cover the branches in early spring, and it is then a vision of loveliness. Hardy, vigorous and rapid growing. No garden or lawn is quite complete without a planting of this splendid tree. It grows 25 feet tall.

Allen's Colorful Flowering Trees Will Add Distinctive Beauty to Your Landscape

◀ 3-N-1 ROSE OF SHARON

3 Colors in bloom at the same time on one Shrub!

(**ALTHEA**) Your garden will be the sensation of the neighborhood when you plant this phenomenal new introduction! Just picture it — flowers of 3 different colors all in bloom at the same time . . . all on the one shrub! Truly a vision of loveliness to highlight your garden. The plants grow 6 to 8 feet tall and produce their beautiful, big blossoms in breathtaking abundance . . . continuously, from midsummer through fall. Extremely hardy. Easy to grow. Thrives in any good garden soil. Requires little care. A sensational new shrub that will reward you with years of garden beauty. Order now for spring planting.

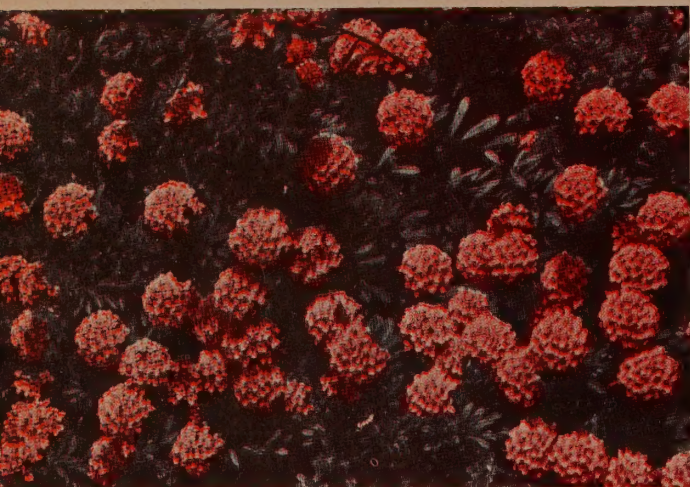

2 to 3 ft. tall.....Each \$2.75, POSTPAID

FIRETHORN ▶

Lovely Decorative Berries

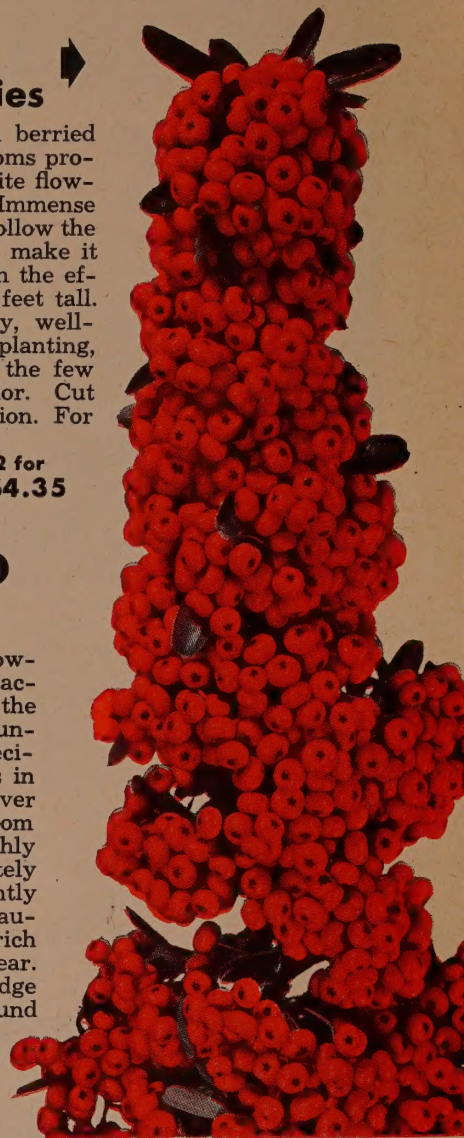

(**COCCINEA Lalandi**) A strikingly colorful berried shrub that retains its foliage all winter. Blooms profusely in spring, bearing large trusses of white flowers, which are but a prelude to the big show! Immense quantities of brilliant orange-scarlet berries follow the blooms and cover the bush so densely as to make it appear as a gorgeous "mound of flame", with the effect lasting well into winter. Grows 4 to 6 feet tall. Very hardy and vigorous. Prefers a sunny, well-drained location. Splendid for foundation planting, the shrub border or a hedge. It is one of the few shrubs which provide brilliant winter color. Cut branches may be used for Christmas decoration. For year-round garden beauty, plant this spring.

POSTPAID Each 2 for
2-yr. plants.....\$2.25 \$4.35

◀ PINK GARLAND FLOWER

(**DAPHNE cneorum**) This beautiful, low-growing evergreen shrub has been acclaimed by leading landscapists as the finest available in its category. It is unequalled as an edging plant, or as a specimen in front of evergreens or shrubs in foundation planting. Does not grow over 8 to 12 inches tall. Blooms profusely from earliest spring to May, when highly scented, rose-pink flowers completely cover the foliage. Blooms intermittently in summer, then quite freely again in autumn. Small oblong leaves are a rich green and remain attractive all year. Makes a very effective low-growing hedge along garden walks, or edging around flower beds, borders, patio, or terrace. A sunny, well-drained location is preferred. Our strain is hardy and easy to grow. **Bushy, 6-12 in. plants, \$2.25 each; 2 for \$4.25, ppd.**

◀ TREE PEONIES

Truly the King of Flowers

Originating in China, where they have been grown for a thousand years in the gardens of the Ming Emperors, Tree Peonies have been called "The Imperial Flower of China" and "The King of Flowers". For sheer majestic beauty, nothing can compare with these rare, exotic plants. In full bloom, they are simply "loaded" with magnificent flowers, often measuring 8 inches across — flowers of exquisite form, with a sheen like Oriental silk on their petals and rich lingering fragrance. One plant is a garden in itself!

Years of Garden Beauty at Minimum Cost and Care!

Tree Peonies are amazingly easy to grow. They succeed equally well in all climates and in any good garden soil. They are very hardy, long-lived and disease-resistant. Unlike herbaceous types, these woody plants do not die back to the ground in winter. Rather, they spread gracefully and grow larger and more beautiful each succeeding year; seldom grow more than 4 to 6 feet tall. Do not cut back any woody branches; simply remove faded flowers to encourage setting of buds for the following season. Plant them where you may have an unobstructed view of their beauty, as a focal point in your garden, or in pairs to accent an entrance or garden walk. We offer the following colors: **RED, PINK, PURPLE, WHITE, YELLOW.** At these prices, you will want several to plant this spring.

Crimson King Maple

colorful

Ornamental Trees

Crimson King MAPLE

(Plant Pat. No. 735) Colorful from early spring to late fall! The new and beautiful form of Schwedler Maple, which originated in Europe. Foliage is rich maroon-purple from the time it leafs out in spring until the leaves drop in fall. Hardy, long-lived; reaches 50 feet at maturity. Develops a rounded, compact top of uniform symmetry. Excellent for parkways and lawn specimens. Its brilliant foliage adds color and variety to the landscape.

WHITE DOGWOOD

(*CORNUS florida*) One of our finest native trees and one of the loveliest of flowering trees. In spring, charming four-petaled white blossoms are borne on spreading branches; in summer it presents a picture of cool, refreshing green; in autumn it becomes gaily colorful as the foliage changes to gorgeous reds. Grows to a height of 10 feet. Will thrive in any fertile soil; prefers a somewhat shaded location. Dogwood makes a beautiful lawn specimen or addition to the shrub border. For naturalizing it is unmatched. Hardy and long-lived; it will give satisfaction for years to come.

POSTPAID Each 2 for
2 to 3 ft. trees.....\$2.50 \$4.50

PINK FLW. DOGWOOD

(*CORNUS florida rubra*) Similar in growth characteristics to the common variety except the flowers are a beautiful rosy-pink color. Blooms so profusely in early spring, every branch is laden with blossoms, presenting a picture of exquisite beauty. The foliage changes to vivid red in the fall and glossy red berries appear, making a very showy display of color. Its lacy shade promotes lawn growth; good clean habit makes it a general favorite for landscaping. A single specimen makes a lovely addition to the lawn; or plant in combination with white flowering Dogwood to create a perfectly beautiful grouping. **Balled in peat.**

Almey Crab

Allen's **SHADE TREES** *Lifetime Enjoyment*

MORaine LOCUST

Fast-Growing Seedless Shade Tree

(Plant Patent No. 836)

This amazing new shade tree has so many outstanding qualities, we are indeed proud to offer it to our customers. It is a rapid growing tree that succeeds well on a wide range of soils. It withstands drought and extremes of temperature and it is not susceptible to disease. Unlike many fast growing trees, it is long-lived and extremely hardy. Being sterile, it does not produce seed pods to clutter the lawn.

The Moraine Locust is a beautiful tree, similar in form to the American Elm. It makes a wide spreading growth. The finely cut foliage provides good shade, yet allows enough sunlight to filter through to promote healthy lawn growth. It attains a height of 25 to 40 feet.

Here is a most desirable tree for the average yard, where good shade is wanted quickly. New home owners especially will benefit by planting the Moraine Locust, for in addition to its other qualities — **it will provide good shade quicker than any tree we know of!** Valuable for tree lawns and parkways, too. We recommend it highly, for here is a tree that will give a lifetime of pleasure and satisfaction.

SUNBURST LOCUST

Spectacular New Color

A spectacular new tree color that will add distinctive beauty to your landscape. **New Sunburst Locust** is so named because the outer tips of the branches are covered with golden yellow foliage in contrast to the deep green inner foliage. In Spring it looks like a flowering tree bursting with "golden" bloom. And it retains this beautiful appearance all summer long.

Sunburst Locust is a tree of stately form and perfect symmetry. It grows rapidly, attaining a height of 35 to 40 feet. Exceptionally hardy; withstands extremes of temperature and will grow rapidly in almost any soil. The lacy foliage provides light shade, which actually promotes good lawn growth. Order early for spring planting.

Sunburst Locust

SHADEMASTER LOCUST

A New Thornless Honeylocust

"Shademaster" is perfectly named — for this new Locust combines all of the desirable characteristics that make a superior shade tree. Lovely dark green, lacy foliage that lets sunlight filter through, providing restful shade without harm to lawns. Has no unsightly seed pods; requires no fall leaf raking. Grass grows right up to the straight, smooth, thornless trunk. Ascending branches form an unbelievably symmetrical top, unlike other Locusts. It is hardy; drought resistant; thrives on poor soil. Grows rapidly to mature height of 25 to 40 feet. The answer for those who want shade in a short time, and a tree of superior qualities and graceful beauty.

ORNAMENTAL VINES

HONEYSUCKLE, Hall's Japan. A strong, vigorous climber with pure white flowers. Foliage stays green nearly all winter. Perfectly hardy, very fragrant, prolific. Ideal for covering old walls; screening purposes. **2-Yr. No. 1 plants, 75c each; 2 for \$1.35; 10 for \$4.25, postpaid.**

SILVER LACE VINE (Polygonum auberti) One of the fastest growing vines. Foliage perfectly clean, never bothered by insects or other pests. A splendid hardy climber of vigorous growth, attaining a height of 25 or more feet, producing during summer and fall, great foamy sprays of white flowers. A well-established plant during its long period of flowering is a great mass of bloom. Clings readily to any support. A beautiful covering for walls, trellises, porches and doorways. **2-Yr. No. 1 plants, \$1.50 each; 2 for \$2.75; postpaid.**

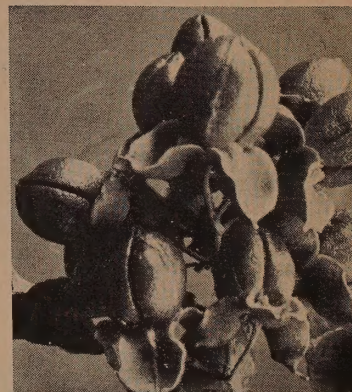

WISTERIA, Chinese Purple. One of the most magnificent hardy climbers. A rapid growing, tall vine, attaining a height of 15 to 20 feet in one season. Produces racemes of pale purple flowers in the spring and autumn. The foliage is grayish green in color and the plant is of such sturdy, woody growth that it may easily be trained to a standard tree form of considerable size, making a beautiful specimen. **2-Yr. No. 1 plants, \$1.50 each; 2 for \$2.75, postpaid.**

BITTERSWEET (Celastrus scandens) A native climber with handsome, glossy foliage and large clusters of orange-crimson fruits, retained all winter. Very bright in effect and charming for winter house decoration. **2-Yr. No. 1 plants, \$1.50 each; 2 for \$2.75, postpaid.**

CLEMATIS VINES. A favorite, strong growing vine. Masses of large blooms cover the entire vine during June or July and often blooming again in fall. Flowers are often 4 to 6 inches across when fully open. **Large, 2-yr., field-grown vines, \$1.65 each; 2 for \$3.10; 4 for \$5.80, postpaid.** Your choice of the following varieties:

JACKMANI — large purple.
MME. LE COULTRE — large, clear white.
VILLE DE LYON — large, deep red.
NELLY MOSER — mauve-pink.
TETRA ROSE — deep pink, very vigorous.

BOSTON IVY. An ideal vine for covering hard surfaces such as stone, concrete, posts and others, for it will cling without support. The vines grow 30 to 40 feet and spread to cover a wide area. The leaves are deep green, three-lobed and grow thickly on the vines. Foliage changes to beautiful shades of reds and yellows in autumn. **2-Yr. field-grown vines, \$1.00 each; 2 for \$1.90; 4 for \$3.60; 10 for \$7.45, postpaid.**

American Bittersweet

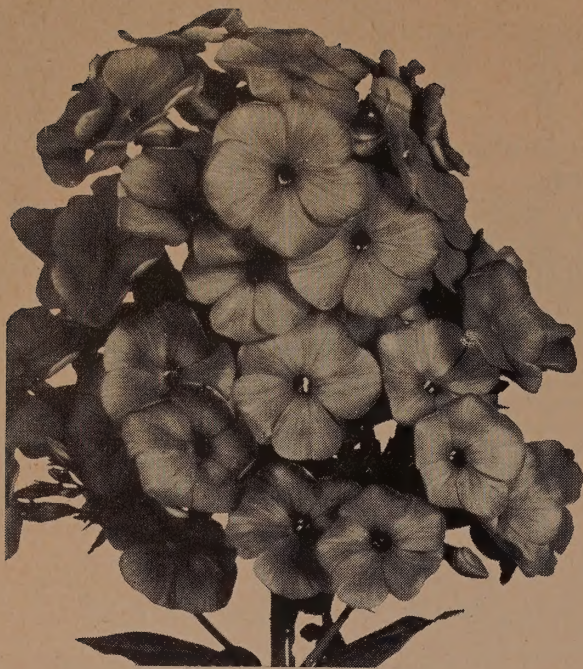

Clematis ♀ ♂ Wisteria

GROUND COVERS — Perfect for Shady Areas

PACHYSANDRA TERMINALIS A perfect plant for shady areas where grass will not grow, and the only plant that will thrive under pine trees. Beautiful, waxy green foliage that stays green all winter. CHARLOTTE ARMSTRONG. Slender, blood-red buds open to cerise blooms of exquisite form; double; sweetly fragrant.

CHRISTOPHER STONE. Freely blooming plant producing fragrant roses of vivid scarlet. Healthy, vigorous grower.

CRIMSON GLORY. The well-known and popular Rose of velvety crimson color and rich fragrance. Profuse bloomer.

ETOILE de HOLLANDE. Gorgeous bright red, non-fading. Large, semi-double, fragrant blooms. Vigorous, well-branched.

GRUSS an TEPLITZ. Dark velvety scarlet blooms, richly fragrant, produced in immense quantities almost continuously.

POINSETTIA. Glowing fiery-red . . . like the Christmas Poinsettia. Perfect buds and blooms of velvety texture, unfading.

RED RADIANCE. Large, double blooms of rich cerise-red. Plant is vigorous, thrives everywhere. Very free-blooming.

PINK SHADES

EDITOR McFARLAND. Brilliant, glowing pink. A profusion of shapely buds and large double flowers on long stems.

PICTURE. Velvety, rose-pink buds and flowers with rich salmon undertones. Double, long-lasting blooms, fragrant.

PINK DAWN. Shapely buds of rose-pink open to large, high-centered blooms with tinge of bronze and gold at the base.

THE DOCTOR. Beautiful, large buds open to enormous semi-double flowers of satiny pink. Fragrant. Vigorous bush.

YELLOW SHADES

ECLIPSE. Noted for its graceful, 2-inch buds and clear, golden yellow color. Does exceedingly well in all climates.

GOLDEN DAWN. Buds of rich sunflower yellow flushed with old rose open to large, fragrant flowers of golden yellow.

MRS. P. S. DuPONT. Long-pointed bud of reddish gold opens to semi-double blooms of deep golden yellow. Long-lasting; fragrant.

TWO-TONED SHADES

AUTUMN. Buds of burnt-orange open to 3-inch flowers of the same burnt-orange splashed with red, orange and pink.

COUNTESS VANDAL. The most artistic rose of all! Combines luscious tones of copper, bronze, pink and salmon. Very lovely.

McGREDY'S SUNSET. Wonderful combination of orange-yellow overlaid with warm salmon-flame. Sweet, fresh fragrance.

TALISMAN. Brilliant red and gold buds open to beautifully formed blooms of scarlet-orange and rich yellow. Fragrant.

WHITE SHADES

K. A. VICTORIA. Delightful, dainty pure white blooms. Long-lasting and fragrant. Blooms abundantly all season.

McGREDY'S IVORY. Long, shapely buds and perfect blooms of ivory-white. Delicate perfume. A consistent show winner.

SNOWBIRD. Exquisite buds and high-centered flowers of immaculate snowy-white. Continuously in bloom all season.

Allen's *Climatized* CLIMBING ROSES

**2-Year, Hardy, Field-Grown Bushes
\$1.35 each; 3 for \$3.85;
6 for \$7.25, postpaid**

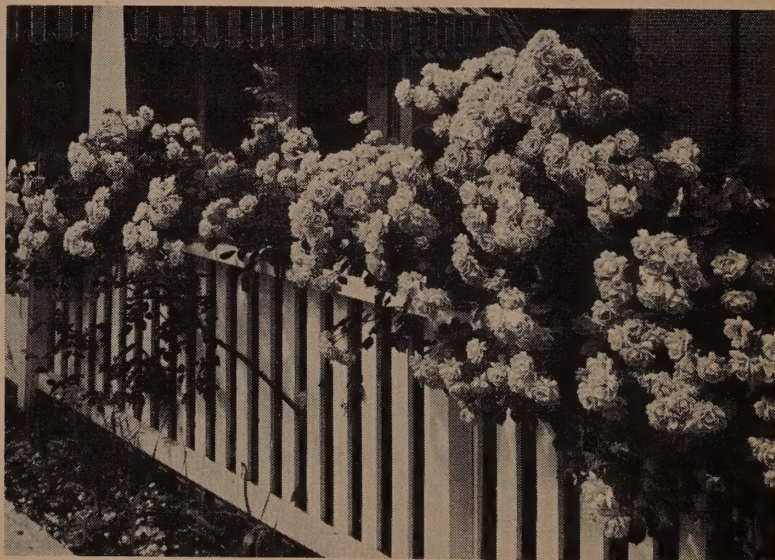

IMPROVED BLAZE. More Everblooming! More free-blooming! Hundreds of brilliant scarlet-red Roses cover the plant from June to September. On fence, wall, pillar or doorway—it thrives with ease, giving a spectacular display all season.

DR. J. H. NICOLAS. Very large, double blooms of Hybrid Tea form and rich fragrance are borne singly on sturdy stems. Beautiful rose-pink color is set off by rich green foliage.

CLIMBING MRS. P. S. DuPONT. Long, pointed bud is reddish gold and opens into a fragrant golden yellow which becomes lighter as it ages. Profuse bloomer.

NEW DAWN. A great Climber. Extremely hardy and vigorous. The blooms are an enchanting appleblossom pink, with delicate old-Rose and Hybrid Tea form. Profuse bloomer.

WHITE DAWN. You'll want to plant this lovely Rose in combination with other Climbers, where the beautiful snow-white blooms will provide sparkling contrast. Fragrant. Very hardy.

PLANT ALLEN'S EVERGREENS

For Year Round Beauty

All of Allen's Evergreens are carefully dug — all the roots protected with a ball of earth, and wrapped with burlap to prevent drying out.

Because this expert protective process makes the trees too heavy to mail, they are shipped by Express or Freight Collect.

These evergreen trees are listed for our customers who will call at the nursery to make purchases.

We do not recommend that these trees be purchased by mail order for delivery by Express or Freight. The cost of delivery is very often as high as the cost of the tree.

AMERICAN ARBORVITAE

(*THUYA occidentalis*). Pyramidal shape; soft green foliage in spring and summer, which changes to brown or bronze in winter; rapid grower. Fine for massing, hedges and screens. Compact, symmetrical growth. Hardy and adaptable to all locations. 2 to 3 ft., \$3.75 each.

PYRAMIDAL ARBORVITAE

(*THUYA pyramidalis*). Most compact and erect of the entire family, with a graceful dignity. Foliage is deep green; retaining its color well throughout the year. Suitable for many landscape purposes. 2 to 3 ft., \$3.75 each.

IRISH JUNIPER

(*JUNIPERUS communis hibernica*). Erect, slender and formal in habit. Foliage sage-green. Very compact, making a splendid column, finally reaching 12 to 15 feet. Selected specimens, 2 to 3 ft., \$3.75 each.

BLUE PFITZER'S JUNIPER

(*JUNIPER Hetzi*). This evergreen grows like its parent, the Pfitzer's Juniper of which it is a sport. A much more rapid grower with a decidedly blue cast. It is a dense grower and very beautiful. Likes plenty of trimming. B & B., 18 to 24 in., \$4.75 each.

PFITZER'S JUNIPER

(*JUNIPER Chinensis Pfitzeriana*). Very dark green, spiral branches, long and whip-like, spreading and keeping quite close to the ground. Widely used in front of taller plants. 18 to 24 in. spread, \$4.75 each.

SPINY GREEK JUNIPER

(*JUNIPER excelsa stricta*). A very dense dwarf variety with beautiful blue-green color. Broad at base, tapering to a cone-shaped head. Slow growing and very useful in borders and foundation plantings. 18 to 24 in., \$3.75 each.

HICKS YEW

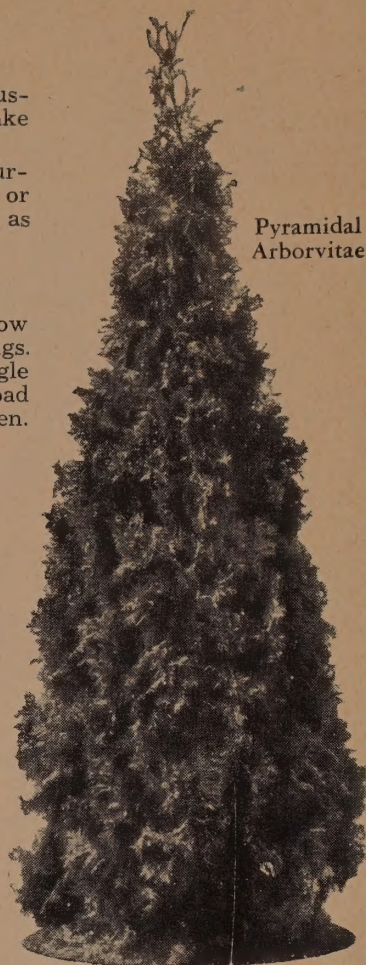

(*TAXUS Hicksi*). Upright, dense growth; columnar form. Beautiful dark green foliage. Bright red berries in fall. Heavily sheared, it makes a striking specimen. Mature height about 5 ft. B & B., 18 to 24 in., \$4.75 each.

JAPANESE YEW

(*TAXUS cuspidata*). Spreading. Beautiful Yew of moderate bushy growth. Upright branches densely clothed with short leaves of dull green. Fine for planting around cottages and brick houses. B & B., 18 to 24 in. spread, \$5.75 each.

GLOBE ARBORVITAE

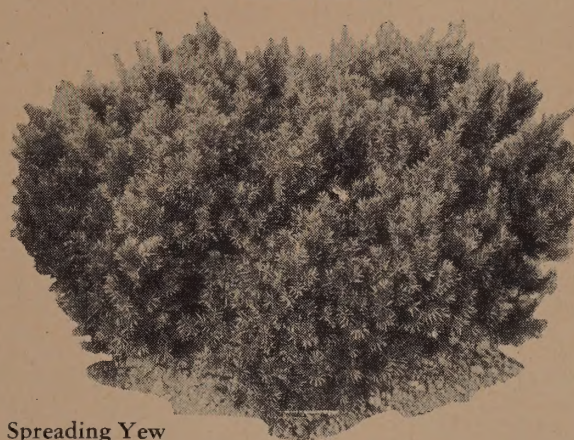

(*THUYA occidentalis globosa*). Forms a dense, low globe that is ideal for foundation plantings. Widely used as entrance markers, and as single specimens in lawn or garden or in groups. Broad fan-shaped leaflets. Handsome shades of green. 15 to 18 inches, \$3.75 each.

New Summer Long EVERBEARING Peach

Think of it! Now you can pick luscious, sun-ripened Peaches all summer long, from a single tree! The first fruits ripen in July and continue in succession until late September. Actual photograph shows Summer Long in its various stages, from bloom to matured fruit. An excellent freestone Peach, for eating fresh, canning, jams and fancy desserts. The flesh is golden yellow, firm, juicy and rich in delicious flavor.

Summer Long bears young, usually the second year after planting; very hardy and vigorous, requiring no special care.

3 to 4 ft. trees.....	2.75	4.95

HOWARD'S MIRACLE PLUM

(Plant Patent No. 721) The most sensational fruit of a decade! Tantalizing, delicious flavor is best described as a combination of Nectarine, Peach and Plum — a "miracle" of taste-tempting good eating. The fruit is unusually large, thin-skinned; flesh is similar to Nectarine in quality. Makes rich-flavored preserves, and it is one of the finest table fruits. Trees are young-bearing, fast growing and heavy producers. Extremely hardy; withstand 20° below zero. Bear over a long period.

POSTPAID	Each	2 for
4 to 5 ft. trees.....	\$3.00	\$5.65

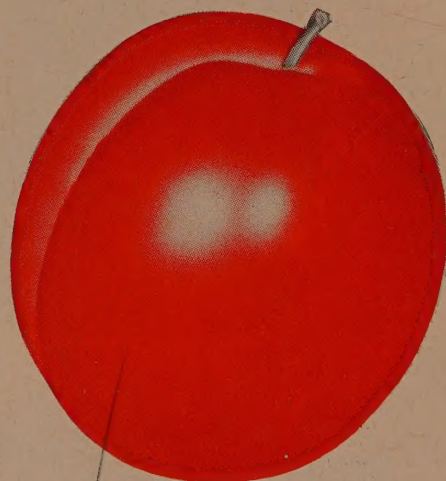

Royal Purple

SMOKE TREE

(*Rhus Cotinus*) A new color never before attained in the Smoke Tree. The foliage is a rich claret color and the feathery plumes, in June and July, are just as richly colored. In late summer matured leaves show a mottled edge of light red around the dark purple center.

The tree grows 8 to 10 feet tall; neat, compact habit; symmetrical form. The "Royal Purple" foliage is a spectacular color display from early spring until late fall. Unequalled for background planting and individual specimens. It is a new English origination.

POSTPAID	Each	2 for
2 to 3 ft. trees..	\$3.95	\$7.50

Sonjana

CLIMBING STRAWBERRY

Unique and amazing plant discovery, originating in Germany. It climbs up to 6 feet and produces big, bright red berries all the way up! Imagine, picking delicious, firm, ripe berries off the vine this summer without stooping or the need to wash off dirt. Being an EVERBEARER, Sonjana will produce berries all summer and fall the first year, and from June until winter thereafter.

Sonjana is ideal for large or small gardens . . . in city, suburban and country areas. It grows just as pictured here — a beautiful, richly foliated plant that can be trained on trellis, wall or fence. And uses so little space — about 2 sq. ft. per plant. So ornamental, you can plant Sonjana anywhere — to beautify a patio or garage wall, or garden fence. A true perennial that will grow, bloom and bear fruit year after year. Order now for spring planting.
